Education

- **B.S. Software Engineering**, Western Governors University 2023—PRESENT
- **ITIL 4 Foundation**, PeopleCert 2025
- **AWS Certified Cloud Practitioner**, Amazon 2024
- **A.S. Computer Science**, Crafton Hills Community College 2023
- **Full Stack Web Development Certificate**, BloomTech (Formerly Lambda School) 2022

Skills

- **Languages:** C#, CSS,, HTML, Python, JavaScript, SQL, TypeScript
- **Technologies:** Bash, Excel, Express, Git/GitHub, Linux (Mint), Monday.com, MySQL, .NET, Node.js, PostgreSQL, React.js, Salesforce, SharePoint, TailwindCSS
- **Additional:** Data Validation, Google Workspace, Hardware & System Troubleshooting, Microsoft Office Suite, Relational Data Modeling, Reporting & Dashboarding, REST APIs, Test-Driven Development (TDD)

Experience

Los Angeles Philharmonic (Non-Profit)

Data Project Assistant

Los Angeles, CA (Hybrid) | Feb 2026—PRESENT

- Directed ongoing Salesforce system operations supporting 1,500+ active student records by implementing configuration enhancements, managing relational data structures, and ensuring consistent data accessibility across 5 program sites
- Remediated critical data integrity issues by auditing datasets, resolving duplicate and incomplete records, and executing bulk record operations to preserve accuracy across thousands of system entries
- Orchestrated reporting readiness for cross-functional stakeholders by validating datasets, maintaining structured data environments, and enabling reliable analysis of program participation and performance

Data & Systems Intern

Aug 2025—Feb 2026

- Cultivated Salesforce platform proficiency by integrating third-party applications including FormAssembly to streamline data collection workflows and utilizing Monday.com, Slack, and Outlook to coordinate task execution, maintain real-time data accuracy, and enable efficient collaboration across cross-functional program teams
- Produced analytical reports using Salesforce and advanced Excel models to evaluate attendance trends, participation rates, and cohort progression across multi-year program cycles
- Strengthened data governance processes by identifying duplicate records, assisting with bulk data imports, and applying standardized naming conventions to improve overall reporting reliability

Underdog Devs

Frontend Engineer Intern

Remote | Mar 2022—Apr 2022

- Refactored a registration feature to improve usability using interactive tooltips and accessible design principles
- Strengthened collaboration and Agile teamwork skills by contributing to a nonprofit educational platform with a cross-functional team
- Applied CI/CD pipelines and Git-based workflows to deploy features and maintain code quality across frontend and backend systems

Projects

Inventory Management System — C# WinForms

- Built a C# Windows Forms application for inventory tracking based on UML class diagrams, enabling users to manage parts and products with auto-generated IDs and data validation
- Implemented business rules in code to ensure Min/Max inventory logic, and enforced encapsulation and inheritance across Part, Product, and Inventory classes
- Designed user experience with dynamic DataGridViews and form logic, allowing users to add, associate, and remove parts from products in real time

Anywhere Fitness — Backend API Platform

- Implemented RESTful API endpoints and middleware using Node.js and Knex to manage course data, improving backend reliability and enabling consistent database transactions
- Designed relational database schemas and authentication mechanisms to secure user access and ensure scalable, structured course management
